

How to paint a simple doll face

Choose and paint a flesh colour

Paint two almond shapes in white with the space of one almond between the two shapes.

Paint two circles in any eye colour towards the top of the almond shape leaving a small space between the eye colour and the bottom almond shape.

Paint a brown line over the top edge of the almond.

Paint two small white highlights in a curve towards the top and to the side inside the coloured circle. Then paint two small black pupils for pupils.

To make the eyes more feminine, add eyelashes to the outer corners of the upper lids.

Paint two small black flat ovals in the place of nostrils.

For lips, paint a simple small curve and directly under a much larger curve. Then connect the four ends of the curves together to form the shape and fill with a red or pink. For more of a smile, curve the corners upward more.

Or, paint a simple crescent shape.

Simple Peg Doll Face

With a very small brush, paint two black eyes. Alternatively, use something like the opposite end of the paint brush to stamp the eyes on.

Paint a simple smile with a curved line in a red tone.

Paint two large pink cheeks at the ends of the smile. Using a cotton bud or other small circular item to stamp the cheek circles on works best.
